Aquatic, Terrestrial and Wetland Biologists

## ELECTROFISHING RAFT

Natural Resource Solutions Inc. (NRSI) is proud to offer a sampling platform that can collect fish from any location. This unique electrofishing raft is highly portable and effective in a broad range of riverine and lacustrine habitats. It is perfectly suited to handle remote, dammed, and inaccessible rivers, and can negotiate Class 2 white-water.

### STUDY DESIGN

- Literature review, study design development
- Logistical planning, preparation and project integration
- Advanced sampling, fish marking techniques
- Agency negotiations and presentations in support of projects

### SAMPLING CAPABILITIES

- Effective sampling in water conductivity ranging from 50 to 4,000 microsiemens/cm<sup>3</sup>
- Remote, hand-held anodes can be used from the boat to extend the sampling range
- Capable of floating and shore-based sampling operations
- Aerated transfer and holding tanks for fish handling, salvage, and stocking operations

### DATA ANALYSIS

- Modern statistical packages and analytical tools available
- Clear and concise reports and presentations
- Focus on repeatable and defensible biological monitoring

## SAFETY FIRST

Have you ever been hampered by environments that cannot be waded, or considered too risky to sample? Let NRSI provide the expertise and equipment that your project requires. NRSI will develop a suitable approach to collecting fish information without compromising staff safety or data quality.
