

NATURAL RESOURCE SOLUTIONS INC.

Aquatic, Terrestrial and Wetland Biologists

ENERGY SECTOR

Natural Resource Solutions Inc. (NRSI) has extensive experience providing biological expertise in a variety of energy settings. For over 15 years, highly trained staff have worked hard to quantify and qualify the terrestrial, wetland and aquatic impacts of energy development, and to facilitate mitigation.

CUTTING EDGE KNOWLEDGE

- Leader in developing bird and bat monitoring methods for wind energy projects
- Member of the Ontario Waterpower Association and the Canadian Wind Energy Association
- Thorough knowledge of the electricity market in Ontario, and how market pressures are translated into generation schedule

VARIETY OF EXPERIENCE

- Wind power developments
- Solar energy projects
- Hydroelectric developments
- Transmission line corridors
- Pipeline studies

SERVICES

- Scientific natural environment research
- In-stream flow studies
- Natural environment input to feasibility studies and facility redevelopment
- Habitat creation and restoration
- Water management planning
- Environmental assessment
- Biological baseline monitoring through all phases of the project life cycle

SOLUTIONS

As investors consider the potential for constructing new facilities and retrofitting existing ones, access to leading edge expertise is more important than ever. NRSI understands the economic reality of investments, and develops balanced solutions to resource conflicts.
