

NATURAL RESOURCE SOLUTIONS INC.

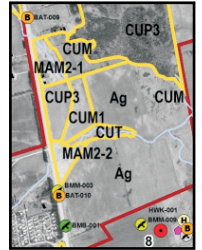

Aquatic, Terrestrial and Wetland Biologists

VEGETATION AND WILDLIFE

Natural Resource Solutions Inc. (NRSI) frequently conducts biological inventories, mapping and habitat evaluations of vegetation and wildlife. Experienced professionals develop and implement monitoring studies and management plans for species and habitat types. NRSI provides expertise in environmental monitoring, environmental impact assessment, ecological preservation and restoration.

INVENTORY

- Vegetation maps using the Ecological Land Classification (ELC) system
- Inventories of plants, birds, mammals, reptiles, amphibians, butterflies, and dragonflies
- Avian breeding, behaviour, visual and radar migration studies
- Acoustic, radar and night vision studies of bats
- Identification of significant, rare and sensitive species and habitats

ANALYSIS

- Assessment of significant and sensitive plant and wildlife species
- Habitat assessments for individual species
- Analysis of potential “core” habitats and ecological linkages
- Environmental Impact Studies, Environmental Assessments

MANAGEMENT AND MONITORING

- Development of single species or ecosystem management plans
- Vegetation and wildlife monitoring
- Restoration of natural habitats

EXPERTISE

The staff at NRSI are ELC certified, highly trained, and experienced in conducting vegetation and wildlife surveys, including analysis and interpretation of the results. NRSI provides vegetation and wildlife surveys designed to meet your needs.
